Energy management Policy

With our firm commitment to environmental sustainability, Nuvoton Technologies strives to reduce the environmental impact of all our product design, services, activities, and production processes. In compliance with energy-related laws and regulations, Nuvoton pays close attention to our stakeholders, while promoting energy management systems to create a green, energy-saving environment. While enhancing the effectiveness of our products, we are also committed to our vision of "Be a hidden champion in providing sustainable semiconductors to enrich human life.". As a result, we have set the goal of achieving net-zero carbon emissions by 2050 and becoming a sustainable enterprise.

The Company's energy policy is as follows:

- Comply with energy-related laws and regulations, involve all employees in energy conservation and carbon reduction efforts, and empower management to reduce energy consumption.
- Implement energy management systems, conduct regular management reviews, and continuously improve energy efficiency.
- Support the purchase of energy-saving products, continuously optimize equipment energy performance, and strive to achieve energy-saving goals.
